Acknowledgments

First and foremost, we wish to thank the talented and collaborative authors who made editing this book such a pleasure. We learned so much from them. Next, to all the young people—girls and boys, tweens and youth, children, nieces and nephews—who participated in the various research projects, we offer a heartfelt cheer for their generosity, their lively spirits, and the many insights they gave us. Without them, this book would not be possible. The impetus and suggestions provided by members of the Digital Girls research project (many of whom are also this book's authors) were invaluable at the crucial proposal writing stage of this book project. The financial support of the Social Sciences and Humanities Research Council of Canada was also essential and much appreciated. We are also grateful to Amanda Moon, and Katie Fahey at Palgrave Press for their support and guidance.

If this book is clearly written, much of the credit should be given to the talented scholar and doctoral candidate Maija Harju who worked long hours with us to improve and clarify portions of the text. We know that all the authors join us in thanking her profusely for her insightful suggestions and comments. Working way beyond the call of duty, Research Assistant Lysanne Rivard gave us just the kind of calm and efficient support we needed to get the manuscript ready for submission. *Merci beaucoup, Lysanne.*

To all the Concordia MA Child Study graduate students enrolled in our course on Children and technology, we send a sincere thank you for helping us test out some of the book's ideas and for challenging our thinking. A special thank you, as well, to Poppy Baktis, Lara Nasser Shuraïda, and Kelly Boudreau for all the many ways, large and small, in which they contributed to our work. We also wish to acknowledge the influence and inspiration we derive from other scholars in the field,

some of whom we have the privilege of studying or working with closely. The references in our chapters reflect their impact.

And finally, our deepest appreciation, as always, to our wonderful families and close friends for their support and understanding. Their patience during the long hours we spent holed up away from them to work on this book is duly noted, with gratitude.

About the Contributors

Brandi L. Bell has a PhD in Communication Studies from Concordia University. Her academic and research interests are broadly encompassed within youth, citizenship, and technology studies and her doctoral work focused on how media representations of Canadian youth situate them within particular citizenship positions. She is currently conducting youth health research at the University of Prince Edward Island, with an interest in finding ways to involve youth in research pertaining to their health and well-being.
brbell@upei.ca

Kelly Boudreau is a doctoral student in Film Studies at Université de Montréal. Her research focuses on understanding the player character relationship in video game play and forms of mediated sociality ranging from the dynamics of social identification in online computer games and virtual worlds to the fusion of internet activity and everyday life.

Diane Carr is Lecturer in Media and Cultural Studies at the Institute Of Education, University of London. Diane has published work on meaning, learning, play, identity and representation in various computer games and virtual worlds, and she is co-author of *Computer Games: Text, Narrative and Play* (Polity, 2006). There is more information at her blog: <http://playhouse.wordpress.com/>.

Shanly Dixon is a doctoral candidate in Concordia University's Humanities Interdisciplinary Studies in Society and Culture Program. Her disciplines include Sociology, Communications and Education to examine the ways in which new media and technology can transform the spaces and experiences of contemporary childhood. Her ethnographic work explores digital culture, transformations in childhood and play, sociality, notions of public and private spaces and cross-generational divides. She teaches the Sociology of Cyberspace at Concordia University and is co-editor of the book *Growing Up Online: Young People and Digital Technologies*.

Seth Giddings is Program Leader for Media and Cultural Studies at the University of the West of England. He is a co-author (Lister et al.) of *New Media: A Critical Introduction* (Routledge, 2nd ed: 2008). He teaches new media theory and practice, and researches popular new media and everyday technoculture.

seth.giddings@uwe.ac.uk

Claudia Mitchell is a James McGill Professor in the Faculty of Education, McGill University and an Honorary Professor in the School of Language, Literacies and Media Education, University of KwaZulu-Natal. Her research areas include work on visual and other participatory approaches to research, girlhood, HIV&AIDS, and media culture. She has authored, co-authored, and edited almost a dozen books; she is also the co-editor of *Girlhood Studies: An Interdisciplinary Journal*.

claudia.mitchell@mcgill.ca

Caroline Pelletier is a researcher at the Institute of Education, University of London. She is based in the school of Culture, Language and Communication. Her work is concerned with how new media technologies shape conceptions of knowledge, learning and teaching.

c.pelletier@ioe.ac.uk

Michele Polak is Assistant Professor in Writing and Rhetoric at Hobart and William Smith Colleges. She has been writing about girl-related issues and online discourse for almost a full decade. With a cadre of nieces aged twenty-three years down to three years, she expects that she will always have a source of inspiration. Speak loudly, girls.

Leslie R. Shade is Associate Professor at Concordia University in the Department of Communication Studies. Her research focus since the mid-1990's has been on the social, policy, and ethical aspects of information and communication technologies (ICTs), with particular concerns toward issues of gender, globalization, and political economy.

lshade@alcor.concordia.ca

Jacqueline Reid-Walsh, a specialist in children's historical literature, girls' popular culture, and old and new media teaching is Associate Professor in the Faculty of Education at Penn State University. She has published on topics ranging from girls reading in the eighteenth century to early moveable books to children's websites and computer games. She is co-author of *Researching Children's Popular Culture: The Cultural Spaces of Childhood* (Routledge: 2002) and co-editor of *Seven Going on Seventeen: Tween Studies in the Culture*
