Table of Figures 7
Index of Tables 9
Abbreviations 10
Summary 13
1 Introduction 15
2 Production and basic characterisation of metathesis fuels 16
2.1 Starting materials and analytical process 16
2.2 Metathesis reactions 17
2.2.1 Cross-metathesis of biodiesel with 1-hexene 17
2.2.2 Cross-metathesis of biodiesel with limonene and pinene 23
2.2.3 Cross-metathesis of biodiesel with 3,3-Dimethyl-1-butene 24
2.2.4 Cross-metathesis of rapeseed oil with 1-hexene 24
2.3 Optimisations 24
2.3.1 Temperature variation and method of catalyst addition 24
2.3.2 Biodiesel pre-treatments 25
2.3.3 Microwave-assisted cross-metathesis 25
2.4 Catalyst removal 26
2.5 Synthesis on a larger scale 27
2.6 Metathesis fuels for more extensive tests 28
3 Investigation of interactions and engine tests 28
3.1 Fuel properties investigation 29
3.1.1 GC-FID analysis 29
3.1.2 Boiling curves 29
3.1.3 Miscibility with other fuels and engine oil 30
3.1.4 Material compatibility 31
3.2 Test engines 31
3.2.1 Farymann single-cylinder test engine 32
3.2.2 Engine OM 904 LA 32
3.2.3 Test cycles 33
3.2.4 AVL single-cylinder test engine based on MAN D28 34
3.3 Analysis of exhaust gas emissions of Farymann and OM 904 LA 37
3.3.1 Carbon monoxide (CO) 38
3.3.2 Hydrocarbons (HC) 38
3.3.3 Nitrogen oxides (NO_x) 39
3.3.4 Particulate matter (PM) 39
3.3.5 Particle size distribution 41
3.3.6 Ammonia 41
3.3.7 Carbonyls 42
3.3.8 Polycyclic aromatic hydrocarbons 44
3.3.9 Mutagenicity 45

4 Results 48
4.1 Investigation of fuel properties 48
4.1.1 Boiling curves 49
4.1.2 Miscibility of metathesis fuel with other fuels and engine oil 52
4.1.3 Material compatibility 55
4.1.4 Analysis of standardised fuel properties 57
4.2 Emissions testing on the single cylinder test engine 58
4.2.1 Regulated emissions 58
4.2.2 Non-regulated emissions 61
4.2.3 Fuel selection for the tests in the commercial vehicle engine 68
4.3 Emissions testing in the commercial vehicle engine 69
4.3.1 Regulated emissions 70
4.3.2 Non-regulated emissions 75
4.4 Determination of the emissions and combustion behaviour 81
5 Outlook 84
Bibliography 85
6 Appendix 92
6.1 Fuel analyses 92
